EDITORIAL POLICY

Operational Research (OR) involves the application of scientific methods to the management of complex systems of people, machinery, materials, money and information. It seeks to produce an understanding of managerial problems and to develop models which will enable the consequences of decisions to be investigated. OR methods have already had widespread application and success in many areas of business, industry and government, and their use is rapidly increasing in social systems and in the international arena.

The European Journal of Operational Research (EJOR) is intended to strengthen these advances by publishing high-quality, original papers that contribute to the practice of decision making, within and beyond Europe, irrespective of whether their content describes an application or a theoretical development. A special call is made for case study papers showing OR in action in firms and other organizations. Mathematical or computer-science contributions should be capable of being used in the foreseeable future.

EJOR has regular, special and feature issues. Every issue contains a leading invited review explaining the developments in an OR topic over the past five years to the general OR reader. In addition, EJOR includes (a) short communications, which may be letters or technical notes, (b) reviews of books published within the previous year, (c) the bulletin of the Association of European Operational Research Societies (EURO-bulletin). The language will be English and attention will be paid to the quality of presentation. However, EJOR actively seeks to publish papers from non-native English speakers and therefore provides free assistance with improvements to the English of otherwise acceptable papers.

Authors of articles within the scope of EJOR are invited to send three copies of their paper to any of the editors at the addresses above. All papers will be refereed and the intended refereeing time is seven weeks. See also the Instructions to Authors at the end of this issue.

Subscription Information. European Journal of Operational Research (ISSN 0377-2217) is sponsored by the Association of European Operational Research Societies within IFORS and is published in four volumes (12 issues) a year. The subscription price for 1985 (Volumes 19–22) is Dfl.760.00 + Dfl.88.00 p.p.h. = Dfl.848.00. Our p.p.h. (postage, packing and handling) charge includes surface delivery of all issues, except to subscribers in Brazil, Canada, Hong Kong, India, Israel, Malaysia, Pakistan, People's Republic of China, Singapore, South Korea, Taiwan and U.S.A., who receive all issues by air delivery (S.A.L. – Surface Air Lifted) at no extra cost. For the rest of the world, airmail and S.A.L. charges are available upon request. Reduced rates for individuals are available under certain conditions; for more information write directly to the Publisher. Claims for missing issues will be honoured free of charge within three months after the publication date of the issues. Mail orders and inquiries to: Elsevier Science Publishers B.V., Journals Department, P.O. Box 211, 1000 AE Amsterdam, Netherlands.

Special regulations for authors. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. The transfer will ensure the widest possible dissemination of information.
Submission of a paper to this journal entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.
Special regulations for readers in the U.S.A. This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970, U.S.A. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US $2.25. also payable through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

Time Series Analysis:

Theory and Practice 6

Hydrological, Geophysical and Spatial Applications

Proceedings of the International Conference held at Toronto, Canada, 10–14 August 1983

edited by O.D. ANDERSON, *TSA&F, Nottingham, England,*
J.K. ORD, *Pennsylvania State University, USA*
and E.A. ROBINSON, *University of Tulsa, Oklahoma, USA*

1985. viii + 308 pages. US $59.25/Dfl. 160.00 ISBN 0-444-87683-9

This volume is divided into three interrelated sections, each of five contributions.
First, the Hydrological papers cover a variety of topics of current interest, but are not tied into such a tightly reinforcing bundle as are the Geophysical ones which follow, where the rapid expansion in digital technology over the past decade has had a profound effect. In this section, the analytic methods of geophysics are linked with the statistical ideas of time series analysis in order to explain how one processes data associated with geophysical surveys.

The final section is devoted to modelling spatial and spatio-temporal processes. A general overview is provided for processes that are stationary in both time and space, and the problem of missing data is discussed.

CONTENTS: Introduction *(O.D. Anderson).* **Parts: 1. Hydrological Time Series.** Causal and Dynamic Relationships between Natural Phenomena *(K.W. Hipel, A.I. McLeod and W.-K. Li).* Grouping of Periodic Autoregressive Models *(R.W. Thompstone, K.W. Hipel and A.I. McLeod).* Information Content of the Mean and Rescaled Range for Short Samples Derived from AR (2) Processes *(D.A. Cluis).* Rainfall at Fortaleza in Brazil Revisited *(P.A. Morettin, A.R. de Mesquita and J.G.C. da Rocha).* Identification and Parameter Estimation of Phosphate Balance Models in Drinking Water Reservoirs *(H. Koppelman and T. Schilperoort).* **2. Geophysical Time Series.** The Right-Half Autocorrelation Theorem *(E.A. Robinson and S. Treitel).* A Review of Nonlinear Regression and its Applications to Geophysical Inverse Problems *(L.R. Lines and S. Treitel).* ARMA Maximum Entropy Spectral Analysis Using Iterative Prewhitening *(C.E. Schmid).* Recent Developments in Seismic Migration *(I.R. Mufti).* An Approach to Seismic Information Extraction *(F. El-Hawary).* **3. Spatial Time Series.** Time Series in M Dimensions: Past, Present, and Future *(L.A. Aroian).* Autoregressive Models in M Dimensions, M = 1, Theory and Examples *(R.J. Perry and L.A. Aroian).* Estimating Missing Values in Space-Time Data Series *(D.A. Griffith, R.P. Haining and R.J. Bennett).* Maximum Likelihood Fitting of STARMAX Models to Incomplete Space-Time Series Data *(D.S. Stoffer).* Forecasting the Spread of an Epidemic *(A.D. Cliff and J.K. Ord).*

Data Analysis in Real Life Environment

Ins and Outs of Solving Problems

Edited by J.-F. MARCOTORCHINO, *Centre Scientifique, IBM France, Paris,* J.-M. PROTH, *INRIA, Rocquencourt, Le Chesnay, France and* J. JANSSEN, *Université Libre de Bruxelles, Bruxelles, Belgium*

ADVANCED SERIES IN MANAGEMENT, Volume 8

1985. x + 318 pages. US $55.50/Dfl. 150.00 ISBN 0-444-87692-8

The stimulating part of this book is to present the comparison between methods and algorithms on the same basis, and with objective criteria of valuation. This approach is completely new in the Data Analysis field.

It is the first attempt at confronting methods of Data Analysis with a true measure: the solving of real life problems. A list of real problems, chosen in advance, were submitted to the participants of the 2nd Data Analysis Symposium of Brussels.

CONTENTS: Preface. Chapter 1: **Descriptive Classification Of CETACEA: Whales, Porpoises and Dolphins.** Papers by: *F. Marcotorchino; G. Vescia; E. Van der Burg; J. Hinde; L. Guttman; J. Hansohm and N. Turulski; E. Diday and J.V. Moreau.* Chapter 2: **Analysis Of Medical Data Set On Patients With Thyroid Cancer.** Papers by: *J.P. Nakache, B. Asselain and C. Lasry; C. Delfosse and W. Rey; S. Levy and L. Guttman.* Chapter 3: **The Calibration Of Traffic – Conflict Techniques.** Papers by: *G. Saporta; S. Oppe; P. Michaud; L. Guttman and S. Levy.* Chapter 4: **Construction Of A Causal Model For One Variable, e.g. By Regression With Optimal Subset Selection.** Papers by: *A. Verbeek; S. Levy and L. Guttman; E. Mohn.* Chapter 5: **Acid Precipitation: Effects On Small Lake Chemistry.** Papers by: *E. Mohn and R. Volden; E. Mohn, et al.; P. Naeve, D. Trenkler and P. Wolf; J.N.R. Jeffers.* Chapter 6: **Study Of The Spare Time Of French High School Students.** Papers by: *E. Diday, F. Lacy and H. Ralambondrainy; G. Leunbach.* Chapter 7: **Parallel Sessions.** *P. Cullus and J. Janssen; J. Janssen, J.L. Mentior, and P. Van Brussel.*

ASSOCIATION OF EUROPEAN OPERATIONAL RESEARCH SOCIETIES (EURO)

within the International Federation of Operational Research Societies (IFORS)

EURO-GOALS

In the belief that the purpose of Operational Research is to improve the well-being of people by improving the relevance and effectiveness of the institutions and organisations which serve them; that it seeks to do so by means of the rational methods of science exercised by representatives of diverse disciplines working together, each supporting the others; that this co-operation which respects no boundaries between disciplines should respect no boundaries between peoples; and that the Operational Research Societies of Europe should more closely co-operate one with another to further the theory and practice of Operational Research, the European Operational Research Societies established in 1975 the Association of European Operational Research Societies (EURO) within INFORS. The members of EURO agree to grant any fully paid-up member of any signatory body all rights and privileges as are offered by them to their own members, to exchange all appropriate information, e.g. bulletins, etc., to include relevant information from other signatories in their bulletin, etc., to inform other signatories of existing working groups and the dates and locations of their meetings, to open such working groups to individual members of other signatories, to organise European conferences on Operational Research and European working groups on topics which are felt to be important by the signatories, to encourage either individually or in concert the formation of Operational Research Societies in other European countries and to give such new bodies any possible help they may require.

Submission of an article for publication entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

Special regulations for readers in the U.S.A. This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970, U.S.A. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of $2.25, also through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

international journal of forecasting

EDITOR-IN-CHIEF:
Spyros Makridakis, *INSEAD, Boulevard de Constance, 77305 Fontainebleau, France*

EDITORS

J. Scott Armstrong
Wharton School, University of Pennsylvania, Philadelphia PA 19104, U.S.A.

Robert Carbone
Faculté des sciences de l'administration, Université Laval, Cité universitaire, Quebec, Canada G1K 7P4

Robert Fildes
Manchester Business School, University of Manchester, Manchester M15 6PB, England

The **International Journal of Forecasting (IJF)** is the official publication of the *International Institute of Forecasters (IIF)* and shares its aims and scope. The Journal publishes high quality refereed papers covering all aspects of forecasting. Its objectives (and that of the IIF) is to unify the field, and to bridge the gap between theory and practice. The intention is to make forecasting useful and relevant for decision and policy makers who need future predictions.

The **International Journal of Forecasting** places strong emphasis on empirical studies, evaluation activities, implementation research and ways of improving the practice of forecasting. It is open to many points of view and encourages debate which aims to find solutions for problems facing the field.

Papers published in the **International Journal of Forecasting** encompass the following areas:
● Evaluation of forecasting methods and approaches ● Forecasting application in business, government and the military ● Implementation research ● Judgemental/psychological aspects of forecasting ● Impact of uncertainty on decision making ● Seasonal adjustments ● Marketing forecasting ● Time series forecasting ● Organizational aspects of forecasting ● Economic and econometric forecasting ● New products forecasting ● Financial forecasting ● Time series analysis ● Economic analysis ● Production forecasting ● Technological forecasting

CONTENTS OF THE FIRST ISSUE:

- A Comparison of Multivariate Forecasting Procedures for Economic Time Series *John L. Kling and David A. Bessler*
- An Examination of the Accuracy of Judgmental Extrapolation of Time Series *Michael J. Lawrence, Robert H. Edmundson and Marcus J. O'Connor*
- Alternative Forecasts of U.S. School Enrollments to 2050: When Will a Trend Blend? *Dennis A. Ahlburg*
- Forecasting Industrial Competitiveness: A Framework *Muhittin Oral*
- Simple versus Complex Extrapolation Models: An Evaluation in the Food Processing Industry *Anne B. Koehler*
- The Anatomy of a Successful Forecasting Implementation *Don M. Miller*

SUBSCRIPTION INFORMATION:

In 1985 the International Journal of Forecasting will be published in one volume of three issues. The subscription price for 1985 (volume 1): Dfl. 188.00/US $69.50 Add Dfl.22.00/US$8.25 for handling and postage costs. Total price: Dfl.210.00/US $77.75. ISSN 0169-2070

Members of the IIF will receive the International Journal of Forecasting as part of their membership.
